Subject: opposition to Yucca Mt. Radioactive Waste Site

LSN: Relevant - Not Privileged

User Filed as: Excl/AdminMgmt-14-4/QA:N/A

To Whom It May Concern,

I am a biologist, trained in ecology. I am strongly opposed to turning Yucca Mountain into a nuclear waste repository. The potential water contamination and resultant damage to all living organisms, humans included, is far too great and for far too long. The transport of materials to the area is also incredibly risk ridden. Financial concerns should not be allowed to overwhelm biological concerns.] Thank you.

Sincerely,
Gail Sabbadini
